

# NSW Health Facility Guidelines

Part E- Building Services and Environmental Design  
(This page is under construction)

Note:

Part E- Building Services and Environmental Design is being written specifically as a planning guideline and not as a performance or outline specification.

It precedes the '[TS11 - Engineering Services and Sustainable Development Guidelines](#)' which directly references regulations and standards, and provides performance benchmarks for use by the Design Team in preparation of the Developed Design and Tender Documentation. TS 11 can be found in the '[Useful References](#)' section of this website
